	<b>Paper Title:</b>	<b>Difficulties of Students from the Faculty of Sciences with Regard to Understanding the Concepts of Chemical Crystallography</b>	
	<p><b>Abstract:</b> The origin of this work on the learning of chemical crystallography at university is the recurrent finding associated with the difficulty experienced by students, resulting in poor marks. The purpose of this study is to identify the difficult concepts in crystallography, to identify possible causes of these difficulties, and to try to offer remedies for this problem. For this we developed a three part questionnaire: the general capabilities of the student, the teaching conditions and the difficulties of students in terms of chemical crystallography. We undertook a survey of chemistry students in the Faculty of Sciences of Ben M'Sik Casablanca. After analyzing the data we found that the difficulties encountered in association with chemical crystallography may be due to several factors : the nature of the concept studied in terms of the difficulty of understanding, inadequate basic knowledge especially in geometry, the ability of low and middle level students with regard to the French language impedes their ability to follow the explanations of the teacher, curriculum overload, lack of concentration during the course and lack of motivation of students.</p> <p><b>Keywords:</b> chemical crystallography, learning, student's difficulties, teaching.</p> <p><b>References:</b>  1. 	<b>Paper Title:</b>	<b>A look at Auditors' Reports to users of financial Statements and to Management: Examples drawn from Societe Generale Ghana and Bank of Africa, Ghana</b>	
	<p><b>Abstract:</b> The purpose of the study is to examine Auditors' Report to users of financial statement and to management with examples drawn from Societe Generale (Ghana) and Bank of Africa (Ghana) respectively. Audit Report is the result of auditing process and it is a key medium of communication, between auditor and financial statement user. The auditors are expected to audit the financial statement of companies so as to present a true and fair view of the company. The methodology for the data used for this research was gathered from both primary and secondary sources. The former was mainly brief interview and the latter through financial reports, textbooks, magazines and web. The process was mainly table in financial statement between 2013 and 2014. The literature review highlighted variables such as proper accounting records, feature of Audit Report, types of Audit Report, Qualified Audit Reports, Other variables in the literature review were audit circumstances, communication to management audit strategy and planning. The results and discussion of the findings shed light related assets; income retained earnings, cash flows, taxation, shareholder funds concluded that the study was carried out in conformity to audit standards such as audit opinion, level of assurance and audit functions. The recommendation highlights on regulation conforming consistency and continuity, efficiency of performance.</p> <p><b>Keywords:</b> auditor, auditor report, financial statement, accounting standards,</p> <p><b>References:</b>  1. 	<b>Paper Title:</b> <b>Detection of Diabetic Retinopathy</b>
	<p><b>Abstract:</b> Diabetes is well known disease and may cause abnormalities in the retina (diabetic retinopathy), kidneys (diabetic nephropathy), nervous system (diabetic neuropathy) and is known to be a major risk for cardiovascular diseases. Diabetic retinopathy is a micro vascular complication caused by diabetes, which can lead to blindness. In early stages of diabetic retinopathy typically there are no visible signs but the number and severity of abnormalities increase during the time. Diabetic retinopathy typically starts with small changes in retinal capillaries. This phenomenon is called neovascularization, which is a serious eyesight threatening state and may cause sudden loss in visual acuity or even permanent blindness. For automated screening programs to work robustly efficient image processing and analysis algorithms have to be developed. This work examines recent literature on digital image processing in the field of early detection of diabetic retinopathy using fundus photographs. Diabetic retinopathy pathologies were further categorized into several groups. In this paper several different databases are presented and their characteristics discussed.</p> <p><b>Keywords:</b> diabetic nephropathy, diabetic neuropathy Diabetic, work, automated screening,</p> <p><b>References:</b></p> <ol style="list-style-type: none"> <li>1. 	<b>Paper Title:</b> <b>A Study of Shape Effect of Natural Draught Cooling Tower by using Ansys.16.5</b>
<b>4.</b>	<p><b>Abstract:</b> In thermal power stations cooling Cooling Tower plays vital role. Along with stresses due to wind load, Seismic load, thermal stresses are predominant in tower. Using ANSYS we can check its thermal response which will be function of time. Natural Draught hyperbolic cooling towers are characterizing land marks of power stations. They comprise of a thin concrete shell of revolution are common place in civil engineering infrastructure. The wind load is always the dominant load in the design of the cooling tower due to its large size, complex geometry and thin wall. This paper deals with the study of thermal analysis of two existing cooling towers of 143.50m and 172m high above ground level with varying thickness in accordance with IS 11504. These cooling towers have been analyzed for thermal loads using ANSYS software by assuming fixity at the shell base. The analysis of two existing cooling towers has been carried out using 8 noded SHELL 181 element with uniform SHELL thicknesses.</p> <p><b>Keywords:</b> NDCT, Wind Analysis, IS 11504, Finite Element Modelling, ANSYS</p> <p><b>References:</b></p> <ol style="list-style-type: none"> <li>1.
